Job Application Director of Engineering

Dear Hiring Manager,

from your web site I note with interest that your are hiring and I hereby wish to apply for the position of Director of Engineering. During my professional career as Competence Center Leader I have gained considerable experience in leading teams of software engineers in development and consulting projects to architect and build high-quality scalable IT products and services across the full value chain from scratch to deployment.

In my operative and strategic roles in IT projects I cover all areas from ideation, analysis of digital business, inception and coordination of digital product roadmaps, requirements engineering and project development. Here, I utilize a toolbox with methods and technologies in early project scoping, established techniques and tools in requirements engineerings, state-of-the-art frameworks and tools in collaboration as well as modern software architectures and frameworks.

In my leadership role I enjoy driving my team to success in project work and career development in an agile, collaborative and empowering culture, that values commitment, feedback, communication, courage and respect. In my previous roles I have been responsible for team building and talent management across recruiting, qualification and retention, including identification of performance and development potential of team members, advancement and dissemination of methods and technology competence within my team.

Now, I am inspired to pursue my interests for innovation at HelloFresh and I am eager to take on new responsibilities in a challenging role.

I look forward to meeting you in person and hope to hear from you soon. Please let me know if you require any additional information.

Yours sincerely,

Dr. Tobias Griebe
