Job Application Senior Technology Enablement Manager 95303

Dear Hiring Manager,

from your web site I note with interest that you are currently hiring and I hereby wish to apply for the position of Senior Technology Enablement Manager for the Digital Attacker (95303).

During my professional career I have gained considerable experience in building high-quality IT products across the full value chain from scratch to deployment. I cover all areas from ideation, analysis of digital business, inception and coordination of digital product roadmaps, requirements engineering, IT architectures and project development. I utilize a toolbox with methods and technologies in early project scoping (e.g. business model canvas, customer journey mapping), established techniques and tools in requirements engineering, modern software architectures and frameworks as well as frameworks and tools for team collaboration.

I enjoy working in an agile, collaborative and empowering culture, that values commitment, feedback, communication, courage and respect.

Now, I am inspired to pursue my interests for innovation at E.ON and I am eager to take on new responsibilities in a challenging role. I look forward to meeting you in person and hope to hear from you soon. Please let me know if you require any additional information.

Yours sincerely,

Dr. Tobias Griebel
