Job Application Project Manager/Programme Manager

Dear Hiring Manager,

from your web site I note with interest that you are hiring and I hereby wish to apply for the position of Project Manager/Programme Manager.

During my professional career in IT I have gained considerable experience in building high-quality IT products and services across the full value chain from scratch to deployment. Based on my background in software development and in IT consulting I have gained the ability to proficiently understand the needs of business stakeholders and software engineers equally, enabling me to lead complex projects to a success.

At my position as Competence Center Leader at adesso AG I exercise my competencies in a variety of key areas in high-profile IT projects, including but not limited to requirements engineering and product management for our customers, more often than not multiple projects in parallel. I cover all areas from analysis of digital business, inception and coordination of digital product roadmaps, requirements engineering, architecture design, product development / product backlog and test management as well as management of internal and external stakeholders.

I enjoy working in an agile, collaborative and empowering culture, that values commitment, feedback, communication, courage and respect.

Now, I am inspired to pursue my interests for innovation at N26 and I am eager to take on new responsibilities in a challenging role. I look forward to meeting you in person and hope to hear from you soon. Please let me know if you require any additional information.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'T. Griebel', with a stylized flourish at the end.
