Job Application Product Manager

Dear Hiring Manager,

from your web site I note with interest that you are hiring and I hereby wish to apply for the position of Product Manager Digital Communication Products.

During my professional career in IT I have gained considerable experience in building high-quality IT products and services across the full value chain from scratch to deployment. Based on my background in software development and in IT consulting I have gained the ability to proficiently understand the needs of business stakeholders and software engineers equally.

At my position as Competence Center Leader at adesso AG I exercise my competencies in a variety of customer centered roles, including but not limited to Product Owner in a business process mobilization project for one of our customers in the financial segment. Here, I managed the digital product roadmap, product backlog, release plans, iteration planning and detailed user stories in aspects from the business perspective as well as technology choices.

I cover all areas from analysis of digital business, inception and coordination of digital product roadmaps, requirements engineering, architecture design, product development and test management. I enjoy working in an agile, collaborative and empowering culture, that values commitment, feedback, communication, courage and respect.

Now, I am inspired to pursue my interests for innovation at Schindler and I am eager to take on new responsibilities in a challenging role.

I look forward to meeting you in person and hope to hear from you soon. Please let me know if you require any additional information.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'T. Griebel', with a stylized flourish at the end.
