Job Application Software Architect

Dear Hiring Manager,

from your web site I note with interest that you are hiring and I hereby wish to apply for the position of Software Architect.

During my professional career in IT I have gained considerable experience in building high-quality IT products and services across the full value chain from scratch to deployment, including the development of scalable system architectures for mobile applications and backend systems.

Most recently I had the opportunity to exercise my competencies in the role of Lead System Architect in a major modernization of a mission critical (mobile) point of sale system for one of our customers in the food retail segment.

In my operative and strategic roles in IT projects I cover all areas from analysis of digital business, inception and coordination of digital product roadmaps, requirements engineering and architecture design. Here, I utilize a toolbox with methods and technologies, established techniques and tools in requirements engineering, state-of-the-art frameworks and tools in collaboration as well as modern software architectures and frameworks.

I enjoy designing and building complex software systems in an agile, collaborative and empowering culture, that values commitment, feedback, communication, courage and respect.

Now, I am inspired to pursue my interests for innovation at Schindler and I am eager to take on new responsibilities in a challenging role.

I look forward to meeting you in person and hope to hear from you soon. Please let me know if you require any additional information.

Yours sincerely,

Dr. Tobias Griebel
