Application Head of Product

Dear Hiring Manager,

from your website I note with interest that you are hiring and I hereby wish to apply for the position of Head of Product. During my professional career I have gained considerable experience in leading teams of product managers and software engineers to build high-quality IT products and services in the logistics domain from scratch to deployment.

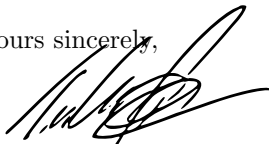

In my operative and strategic roles in logistics-centered IT projects I have covered all areas from analysis, discovery and coordination of digital product roadmaps, requirements engineering and product development. To maximize value for customer and business I utilize a toolbox of methods and technologies for early project scoping, techniques and tools in requirements engineering, state-of-the-art frameworks and tools in collaboration as well as modern software architectures and frameworks to drive ideas from MVP to fully fledged products to scale.

In my previous leadership roles I have built and lead product and engineering teams through all stages of seniority across recruiting, qualification and retention, including identification of performance and development potential of team members, advancement and dissemination of methods and technology competence within my team. I enjoy driving my team to success in terms of setting high-quality goals, project work and career development in an agile, collaborative and empowering culture, that values commitment, feedback, communication, courage and respect.

Now I am inspired to pursue my interests for innovation at SEVEN SENDERS GmbH and I am eager to take on new responsibilities in a challenging role.

I look forward to meeting you in person and hope to hear from you soon.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'T. Griebe', with a stylized flourish at the end.
